OBJECTIVE

Computational Mathematics student at the University of Waterloo with experience building full-stack AI-powered applications. Seeking co-op opportunities where I can apply my technical skills to solve real-world problems.

EDUCATION

University of Waterloo Sept. 2025 – Oct. 2030
Bachelor of Mathematics, Computational Mathematics Waterloo, ON

- Relevant coursework: Calculus 3, Intro to Differential Equations, Intro to Combinatorics, Data Types & Structures
- President's Scholarship for Distinction — awarded to students entering with an average of 90% or higher

EXPERIENCE

CyberWolfe Jul. 2024 – Aug. 2024
Cybersecurity Analyst Oakville, ON

- Earned ISC2 Basic Cybersecurity Certification within the first week of joining
- Audited 50+ small business websites for security vulnerabilities, compiling a written report with actionable findings for each
- Identified potential clients by assessing security posture across companies in the Greater Toronto Area

Northern Karate Schools Feb. 2021 – May 2025
Assistant Instructor Toronto, ON

- Led classes of 15 to 20 students through technical drills and sparring techniques
- Accelerated student belt progression through targeted feedback and individual coaching

PROJECTS

Waive waivelegal.vercel.app

- Built a legal document analysis tool using Next.js 14, TypeScript, and a local Ollama AI model that reads government notices and computes exact response deadlines
- Engineered a deterministic deadline engine with 70+ tests covering multi-jurisdiction statutory rules across SSA federal, Ontario, BC, and California
- Placed 2nd overall at SteminateHacks Hackathon out of over 50 teams, demoed live to 12 judges

CourtIQ fantasy-agent-kappa.vercel.app

- Built an AI-powered NBA fantasy sports analyst using Next.js 16, TypeScript, and the Anthropic Claude API
- Integrated the Sleeper public API to pull live league data including rosters, scoring settings, and waiver rules
- Engineered a demo mode with pre-built data so users can try the product without an account

Vigil vigil-psi-liard.vercel.app

- Built a website security scanner in Python that checks HTTPS, TLS, security headers, cookies, exposed files (e.g. .env, .git), and email spoofing (SPF/DMARC); scores sites 0–100 with an A–F grade
- Automated SSRF protection by resolving hostnames once and pinning connections to that IP, blocking DNS rebinding attacks and redirects to private addresses
- Implemented a CLI, REST API (FastAPI), web dashboard, and Chrome extension (Manifest V3) with 83 tests; deployed on Vercel with Redis for cross-instance rate limiting

SKILLS

Languages: Python, JavaScript, TypeScript, HTML/CSS, C/C++
Frameworks: Next.js, React, Tailwind CSS, Node.js
Tools: Git, GitHub, VS Code, Vercel, Terminal
AI/ML: Anthropic Claude API, Ollama, Prompt Engineering, Local AI Model Integration

CERTIFICATIONS

ISC2 Basic Cybersecurity Certification Jul. 2024
Emergency First Aid + CPR Level C (WMC) Nov. 2023 – Nov. 2026
